# A New Excellence of Performance

## Boost Your Profitability

Boosting your company's profits was the main goal that Ingersoll Rand had in mind when it designed the revolutionary NE-T Series line of integrated rotary screw air solutions. So how can a compressed air system help you increase profitability? The answer is really pretty simple, by ensuring that you achieve highest productivity in your shop while minimizing the total costs of ownership to the absolute lowest levels.

The NE-T Series is more than an integrated air system, it's a complete air solution designed to maximize the key drivers of profitability in today's business:

- Uptime Reliability
- Shop Productivity
- Flexibility Of Operation
- Energy Efficiency & Savings

Welcome to Ingersoll Rand's NE-T Series Rotary Air Solutions, a New Excellence of Performance.

Achieve **Highest Productivity** and **Lowest Total Cost** of Ownership

# Exceptional Compressor Value

## Ultimate Reliability

**Maximum Uptime**  
Ingersoll Rand's new NE-T series ensures maximum uptime.

**70% Fewer Connections**  
Smart integration eliminates leaks and pressure drops maximizing reliability.

## Ultimate Efficiency

**More Air For Your Money**  
Industry leading performance delivers more air for less horsepower, saving thousands of rupees per year on energy.

**Smart Energy Efficient Controls**  
Eliminates the compressor from running unloaded by cycling the compressor on/off.

## Ultimate Flexibility

**Compact Footprint Design**  
Small footprint frees up valuable floor space and reduces Installation cost.

**Installation Close to Point-of-use**  
Whisper quiet operation allows for installation closer to point-of-use, reducing costs and ensuring a better & safer work environment.

## Ultimate Productivity

**Closely Maintained Pressure**  
Closely maintained discharge pressure avoids excessive pressure bands & increases downstream tool and equipment life.

## Innovation

**High Efficiency Integrated Compression Module**  
To provide maximum performance, efficiency and ease of service, the airend, interconnecting piping and separation system have all been integrated into one simple design. Integration of the compression module eliminates leaks and pressure losses to increase efficiency and performance. Service and maintenance are made extremely easy through spin-on oil and separator cartridge.

# Low Cost of Ownership

Our Refrigerated Dryers offer design features that reduce energy consumption and improve reliability

- 1 Corrosion resistant heat exchangers reduce airflow restrictions, providing more efficient throughput with less wasted energy; a built-in stainless steel de-mister efficiently removes all moisture.
- 2 Dryer's Microprocessor based control with an easy to use graphic interface lets the operator adjust and manage system parameters easily and efficiently.
- 3 Variable speed fans reduce power consumption when units operate at less than maximum cooling capacity, while ensuring a consistent dew point.
- 4 Reliable, totally hermetic compressors use environment friendly refrigerants.
- 5 The programmable electronic drain valve is fully adjustable to help minimise air loss.
